

**January 2008**  
**Nassau Supervisor's Report**

Happy New Year! The transition to a new administration at the Nassau Town Hall has been going well.

It is only the second week of January and the Town Board has already met on two occasions. The minutes of these meetings are available on our town website at [www.townofnassau.org](http://www.townofnassau.org). I strongly encourage our residents to visit this site and use it as a reference tool for your town government.

On January 1, it was my pleasure to appoint Mr. Ron Sears as the new Deputy Supervisor. Many of you know Ron from his years of service in our community and his family connections that reach back generations. He has graciously agreed to continue his tradition of service to our town by serving in this capacity at no pay.

I have also re-appointed Mrs. Sue Shields as our Town Historian. Mrs. Shields has provided a great deal of information for residents and visitors to the town and is ready to provide some new formats for information. Please stay tuned for more on these ideas.

The Town Board has also appointed a new Supervisor's Clerk. Ms. Diane Maguire is available in my office and is providing excellent service to our residents. Please feel free to stop by and welcome Diane to our staff.

There are new opportunities for service in your community. At our last town board meeting, I offered new resolutions, which were unanimously passed by the town board, to create two new town advisory committees. The Town Advisory Committee on Youth and the Town Advisory Committee on Seniors are currently being formed. If these are areas of interest to you, please send me a note through our website, telephone me at town hall or send a letter of interest to my office. We warmly welcome all members of our community to get involved and contribute to these worthy committees.

Additionally, I have asked the Town's Natural Resource Committee to conduct an inventory of all town-owned lands. This request was made to solicit their analysis and recommendations to the Town Board as to how we may provide recreational access to these lands for our residents. I look forward to their report. We will be sure to keep you informed of their progress.

I would like to close by thanking former Supervisor Seney and the many members of our community that have assisted in providing a smooth transition in Town Hall. I would also like to thank our new and returning employees and officials for their hard work.

Best wishes for a healthy and prosperous 2008.

Sincerely,  
David Fleming, Nassau Supervisor
